

NYANZA DISTRICT GENDER STATISTICS REPORT, 2013

March 2013

Supported by UN Women/UN Delivering as One

Foreword

A nationwide program to mainstream Gender equality in all national development programs and activities was initiated by the Government of Rwanda immediately after the emergency period that followed the tragic Genocide of the Tutsi of 1994. The change that Rwanda wanted concerning promoting and empowering women was firstly manifested in the 2003 Constitution which stipulates that women should constitute 30 percent in all leadership positions in the country.

Achieving development for all requires formulation of inclusive policy that recognizes the role of gender equality to determine outcomes for women and men in the community. Generally, access to updated and reliable gender statistics is extremely requisite to eliminate gender blindness in the formulation of policies.

It is from the above background that the National Institute of Statistics of Rwanda (NISR) in collaboration with the Gender Monitoring Office (GMO) and UN Women through ONE UN / Delivering as One (DaO) embarked on establishing a comprehensive Gender Statistics Framework (GSF) resulting in Gender Statistics Report with gender equality highlights in key development sectors. The aim of the framework is not only to encourage policy debates in particular around gender gaps but also capture good practices by providing evidence.

Accordingly, this Gender Statistics Report shows the gap between men and women, and also provides a viable benchmark situation on the gender status in different development sectors. The present edition shows the current data for eleven fields namely Gender and Population; Gender and Education; Gender and Health; Gender, Employment and time use; Gender, Social Protection and Disasters Management; Gender and Justice; Gender, Environment and Natural Resources; Gender, Decision making and Governance; Gender, Infrastructure, ICT and Media; Gender, Trade and Business; Gender, Industry and Processing; Gender, Agriculture, Livestock and Forestry; and lastly Gender, Income and Access to Finance. However, it should be noted that some indicators are not disaggregated by sex due to the smallness of survey sample.

We are confident that this report will be a timely data bank of useful development information on Rwanda. Therefore, the National Institute of Statistics of Rwanda looks forwards to a continued partnership with One UN and Gender Monitoring Office to bring this initiative forward, and expects more users' needs for consideration in future editions preparation

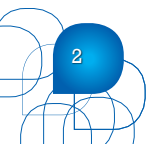

Yusuf MURANGWA
Director General

Acknowledgement

This report has been prepared with participation of a large number of individuals and organizations. We would like to express our gratitude to all of them and sincere appreciation to the partner Ministries, Institutions, agencies and UN Women for their respective great support and inputs throughout the process of writing and publishing this report.
